

MDP

MEDICAL DEVICE PURCHASE

LARYNGOSCOPES

CUTTING EDGE ILLUMINATION

Use our reusable German quality stainless steel laryngoscope with our improved long life and energy efficient fiber optic LED lighting wherever you want... whether in hospital operating room, emergency room, ambulatory surgery center, or out in the field.

We use extremely durable German quality stainless steel handles and blades with choices of Miller, Macintosh, and Conventional blades with broad choice of light sources... Halogen, LED, and Xenon.

In addition, MDP offers disposable laryngoscopes for reduced patient risk.

Visit our website for our full range of high quality laryngoscope products. Ask about our laryngoscope warranty.

Innovative blade designs such as FixTube protects your investment.

Quality • Integrity • Reliability

For performance you can trust

- German quality stainless steel
- Top quality and performance
- Fiber optic & conventional handles and blades available in all specified sizes
- Disposable sterile blades & handles also available
- Laryngoscope lights available in Halogen, LED, or Xenon
- We offer innovative FixTube as well as FlexTip blades

MDP offers German quality stainless steel handles with Halogen, Xenon, or LED lighting in conventional and fiber optic styles as well as an assortment of sizes for adult, pediatric/penlight, and stubby handles.

Designed for ease-of-use to improve patient care, safety, and staff satisfaction

Blades are sandblasted with smooth edges. Bulbs are easy to change.

MDP offers every possible selection of German quality Macintosh, Miller, Phillips, and Wisconsin blades.

BLADES

Our blades feature:

- Extremely durable German quality stainless steel
- Available in all sizes for Macintosh, Miller, Phillips, and Wisconsin
- Smooth edges. No sharpness.
- Blade angles that meet international standards
- Optimal lighting system and blade designs for unobstructed view
- Autoclavable

SPECIALTY BLADES

MDP Offers FlexTip Fiber Optic Macintosh laryngoscope blades (size 3 & 4) with a tip that is adjustable through 70 degrees. By pressing a conveniently positioned lever, the blade tip gently lifts the epiglottis in a smooth, controlled motion to give a clear view of the vocal chords. Contact with the upper row of teeth and unnecessary pressure on the tongue & soft tissue are avoided. The benefits are as follows:

- Adjustable blade tip facilitates difficult intubation
- Reduced risk of trauma to teeth and tissue
- Integrated fiber optics with better fiber bundle & LED bulb for better illumination
- High quality stainless steel construction without crevices or bacteria traps, thus avoiding major cause of cross contamination

In addition, MDP offers FixTube blade that extends blade life even better by preventing rust due to sterilization. The space between blade and the tube is closed with silver soldering, thus making it easy for the water drops to drip instead of sticking to that area.

Ask about our HiLiter Fiber Optic Macintosh blades (sizes 3, 4 & 5) with mega fiber bundle, 4.3mm dia. and up to 6750 micro-fibers for improved light transmission and longer life

German Quality Stainless Steel • All metal construction • Reusable handles can be sterilized

HANDLES

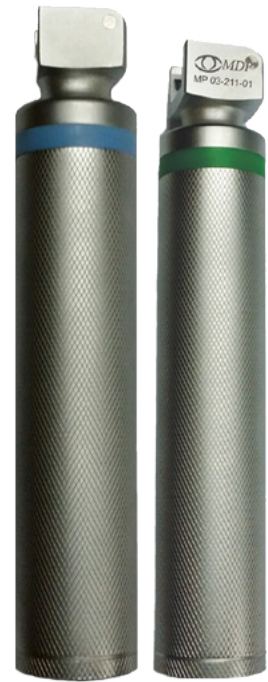

Our reusable handles feature:

- Extremely durable German quality stainless steel
- Rotating rods for easy fitting and removal blades
- Different band colors to distinguish between Fiber and Non-Fiber handles
- Knurled design of handle facilitates a strong grip and prevents slipping
- Exact threading of bottom cap for easy battery change
- All Halogen, LED, and Xenon blubs are easily removed and filled

 Length: 15 cm - Diameter:
 18mm; Uses 2-AA Batteries

Adult Regular Handle:
 Length: 16 cm - Diameter:
 29mm; Uses 2-C Batteries

Stubby Handle: Length:
 12.5 cm - Diameter: 31mm;
 Uses 2-AA Batteries

DISPOSABLE LARYNGOSCOPES

Our single use laryngoscopes offer a safe and effective solution for total cross-contamination control as well as eliminating the time and expense of sterilization. This provides safe patient care at a fraction of the costs of reusable laryngoscopes. Our disposable aluminum handle with fiber optic and LED lighting ensures optimal viewpoint. LED lamp unit and batteries are sealed and inaccessible for replacement.

Disposable Aluminum Handle- batteries and LED lamp unit are sealed inside the handle.

OUR NEW LED BULB MAKES IT EASIER AND SAFE FOR AIRWAY MANAGEMENT

When dealing with a difficult airway during tracheal intubation, it is vital for healthcare professionals to have the best laryngoscope equipment on hand that provides comfort and quality lighting. That is where our reusable and disposable fiber optic laryngoscopes with our new LED lighting system rise to the occasion, which makes it a better choice for anesthesiologists.

Our newly improved LED bulb with Mega Fiber Optic Macintosh blade provides 30-40% brighter illumination than the Standard Fiber Optic Macintosh blade.

Battery Required For Handles

- 2 - C Batteries for Regular Handles
- 2 - AA Batteries for Small/Penlight/Pediatric Handles
- 2 - AA Batteries for Stubby Handles

Sterilization of laryngoscopes: Reusable blades and handles can be sterilized using most standard techniques, including anti-microbial soaks, Steris Amcso V-Pro low temperature sterilization, Sterrad hydrogen peroxide gas plasma sterilization, and steam autoclave processing. Instruments should not be subjected to more than 350 degrees Fahrenheit or 177 degrees Celsius.

Warranty: Our reusable handles come with a 5 year storage/performance warranty. We will repair or replace our laryngoscopes in case of defective material or poor workmanship.

Instrument care: Use deionized water for sterilization, and always clean before sterilization with PH 7.0 cleaning solution. Do not expose instruments to atmospheres of chloride ions, mineral acids and fumes. Clean immediately after use by wiping and brushing with a soft plastic brush. Do not use instruments that become damaged or worn in any way. This instrument should be used only as intended by a qualified professional.

Warning: Stainless Steel contains nickel and chromium. A small percentage of the population is known to be allergic to these metals.
